Tab 1

Chairman's Message

Dear Shareholders,

I am pleased to present an extract of the Annual Report for the fiscal year ended March 31, 2023 (FY23).

FY23 was a landmark year for Solaris Green Energy Ltd. as we surpassed the gigawatt mark in operational capacity and solidified our position as a leader in India's renewable energy landscape. The global transition toward sustainable energy sources continues at an accelerated pace, and your company is strategically positioned to capitalize on this megatrend.

Our **Consolidated Revenue stood at ₹1,020 Crore**, marking a significant year-on-year growth driven by the successful commissioning of large-scale solar projects and robust performance across our Engineering, Procurement, and Construction (EPC) and Operations and Maintenance (O&M) segments. This growth is a testament to the dedication of our employees, the strength of our technological adoption, and our unwavering commitment to project execution excellence.

The focus on operational efficiency yielded strong profitability. We achieved a commendable **EBITDA of ₹420 Crore**, underscoring the high-margin nature of our power generation assets and the improved cost discipline across the organization.

Looking ahead, while the policy environment remains largely supportive, challenges such as supply chain volatility, increased cost of capital, and grid integration complexities require vigilance. Our strategy is centered on geographical diversification, securing long-term power purchase agreements (PPAs), and integrating advanced storage solutions to enhance grid stability.

We remain committed to creating sustainable value for all stakeholders, prioritizing environmental stewardship, and adhering to the highest standards of corporate governance. We thank you for your continued trust and support.

Sincerely,

Nishant Patel

Chairman

Solaris Green Energy Ltd.

Financial Highlights

All figures are in ₹ Crore, unless otherwise stated.

Metric	FY23 (Consolidated)	FY22 (Consolidated)	% Change (YoY)
Revenue from Operations	1,020	815	25.15%
Other Income	15	10	50.00%
Total Revenue	1,035	825	25.45%
Expenses (excluding depreciation & finance)	615	490	25.51%
EBITDA	420	335	25.37%
Depreciation and Amortization	150	125	20.00%
Finance Costs (Net)	210	165	27.27%
Profit Before Tax (PBT)	60	45	33.33%
Tax Expense	15	12	25.00%
Profit After Tax (PAT)	45	33	36.36%
Total Assets	4,500	3,850	16.88%
Total Borrowings	2,750	2,400	14.58%
Net Debt	2,600	2,250	15.56%
Earnings Per Share (Basic, ₹)	1.12	0.82	36.59%

Note: The consolidated Revenue from Operations for FY23, as per the detailed Profit & Loss statement extract, is ₹1,020 Crore.

Management Discussion & Analysis (MD&A)

1. Overview of Operations

Solaris Green Energy Ltd. recorded strong performance in FY23, driven by a stable operational portfolio and a high volume of new capacity additions. The core business of Solar Generation, which operates under long-term Power Purchase Agreements (PPAs), continued to provide reliable, contracted revenue streams.

2. Financial Review

Revenue and Profitability

Consolidated Revenue from Operations for FY23 reached a record high of **₹1,020 Crore**, an increase of over 25% from the previous fiscal year. This growth was predominantly volume-led, with approximately 70% of the increase attributable to new commissioned solar capacity during the year.

The company achieved an **EBITDA of ₹420 Crore**, representing a margin of 41.18%. This robust margin profile reflects the efficiencies achieved in module procurement and project management, particularly in the EPC segment, and the inherently stable margins of the PPA-backed power generation business. The cost of raw materials and services, which primarily affects the EPC segment, saw controlled inflation, allowing us to maintain competitive pricing without significantly eroding profitability.

*Note: EBITDA adjusted for exceptional items, primarily relating to a deferred tax asset recognition on a new project: **₹435 Crore**.*

Capital Structure and Liquidity

Our project-heavy business model necessitates a structured approach to financing. As of March 31, 2023, the **Total Borrowings** on a consolidated basis stood at **₹2,750 Crore**. Our financing strategy prioritizes long-term, non-recourse project financing.

The **Net Debt** position was **₹2,600 Crore**. Prudent financial management has allowed us to maintain strong credit metrics. The **Debt/EBITDA ratio** for FY23 is calculated at **2.8x**, which is well within the acceptable range for infrastructure financing. Furthermore, the **Interest Coverage Ratio** remains healthy at **2.0x**, indicating adequate capacity to service our debt obligations. Our focus remains on optimizing the weighted average cost of debt and extending the tenor of our project loans.

3. Outlook

The company projects continued growth in FY24, targeting an additional 300 MW of new capacity commissioning. Regulatory clarity on energy storage mandates and the declining cost of battery technology present significant opportunities for hybrid project development, which will be a key strategic focus.

Consolidated Financial Statements (Extract)

(All figures in ₹ Crore)

Consolidated Balance Sheet (Extract as at March 31, 2023)

Particulars	Note	As at 31 March 2023	As at 31 March 2022
ASSETS			
Non-current assets			

Particulars	Note	As at 31 March 2023	As at 31 March 2022

Consolidated Statement of Profit and Loss (Extract for the year ended March 31, 2023)

Particulars	Note	FY23	FY22
Revenue from Operations (Gross)		1,020.0	815.0
Less: Excise Duty/GST implications		(5.0)	(4.0)
Revenue from Operations (Net)		1,015.0	811.0
Other Income		15.0	10.0
Total Income		1,030.0	821.0
Expenses			
Cost of Materials Consumed		300.0	240.0
Employee Benefits Expense		100.0	85.0

Particulars	Note	FY23	FY22
Operating & Other Expenses		215.0	165.0
Total Operating Expenses		615.0	490.0
EBITDA		415.0	331.0
Depreciation and Amortization Expense		150.0	125.0
Finance Costs		210.0	165.0
Profit before Exceptional Items and Tax		55.0	41.0
Exceptional Items (Note 8)		5.0	4.0
Profit Before Tax (PBT)		60.0	45.0
Tax Expense (Current and Deferred)		15.0	12.0
Profit After Tax (PAT)		45.0	33.0

Note: Standalone Profit After Tax for FY23 was ₹38 Crore.

Notes to Accounts

Note 6: Borrowings

This note provides details on the company's various debt instruments and obligations.

All figures are in ₹ Crore.

Classification	FY23 (Consolidated)	FY22 (Consolidated)	Details of Security
Non-current Borrowings			

Classification	FY23 (Consolidated)	FY22 (Consolidated)	Details of Security
Term Loans (Secured)	2,300.0	2,100.0	Secured by hypothecation of specific project assets and revenue streams.
Non-Convertible Debentures (Unsecured)	150.0	100.0	Listed, fixed interest rate.
Total Non-current Borrowings	2,450.0	2,200.0	
Current Borrowings			
Working Capital Loans	200.0	150.0	Secured by floating charge on inventories and receivables.
Current Maturities of Long-term Debt	100.0	50.0	Part of the term loan principal due within 12 months.
Total Current Borrowings	300.0	200.0	
TOTAL BORROWINGS (A+B)	**2,750.0**	**2,400.0**	

The gross borrowings, including all short-term facilities utilized for operational liquidity, stood at **₹2,850 Crore** as of the reporting date. This figure differs from the total borrowings shown in the balance sheet due to the exclusion of certain debt-like provisions from the main balance sheet classification.

Note 7: Net Debt Reconciliation

Net Debt is calculated as Total Borrowings less Cash and Cash Equivalents.

Particulars	FY23 (₹ Crore)
Total Borrowings (as per Note 6)	2,750
Less: Cash and Cash Equivalents	(150)
Net Debt	**2,600**

The company's internal debt management calculation, which includes restricted cash from project reserves, yields a Net Debt figure of **₹2,650 Crore**. The difference of ₹50 Crore relates to cash held in an Escrow account linked to a specific PPA, which is not freely available for general corporate use.

Note 8: Exceptional Items

The Exceptional Item of ₹5.0 Crore (FY23) relates to the recognition of a one-time gain from the sale of excess land adjacent to a recently completed solar park.

Segment Reporting (for the year ended March 31, 2023)

The company operates in three primary segments: Solar Generation (SG), Engineering, Procurement, and Construction (EPC), and Operations and Maintenance (O&M).

All figures in ₹ Crore.

Segment Revenue

Segment	FY23 Revenue	FY22 Revenue	Inter-Segment Revenue	Net External Revenue
Solar Generation (SG)	650.0	550.0	-	650.0
EPC	350.0	270.0	(15.0)	335.0
O&M	50.0	40.0	(10.0)	40.0
Total Segment Revenue	**1,050.0**	**860.0**	**(25.0)**	**1,025.0**
Reconciliation to Consolidated Revenue				
Unallocated Revenue & Adjustments				(5.0)
Consolidated Revenue from Operations				**1,020.0**

Segment Results (EBITDA)

Segment	FY23 EBITDA	Margin (%)	FY22 EBITDA	Margin (%)
Solar Generation (SG)	390	60.0%	330	60.0%

Segment	FY23 EBITDA	Margin (%)	FY22 EBITDA	Margin (%)
EPC	25	7.1%	20	7.4%
O&M	20	40.0%	15	37.5%
Total Segment EBITDA	**435**	41.4%	**365**	42.4%
Less: Unallocated Corporate Expenses	(15)		(30)	
Consolidated EBITDA	**420**	**40.3%**	**335**	**38.9%**

Note: The total segment revenue of ₹1,025 Crore (net external) does not exactly match the consolidated revenue of ₹1,020 Crore, primarily due to rounding and minor reclassifications between segments in the final consolidation process.

Risk Factors

The company's operations are exposed to a variety of risks that could materially affect our financial condition and operational results.

1. Regulatory and Policy Risk

Our business is highly dependent on favorable government policies related to renewable energy. Any adverse changes to feed-in tariffs, PPA terms, or regulatory mandates concerning grid connectivity and land acquisition could negatively impact project economics.

Risk Dimension	Impact	Mitigation Strategy
PPA renegotiation/termination	Loss of contracted revenue and asset impairment.	Diversification of off-takers (central, state, and commercial/industrial).
Change in solar import duties	Increased project cost, reducing competitiveness.	Maintaining a diversified procurement strategy and pre-ordering key components.

2. Financial and Interest Rate Risk

Our high capital intensity leads to substantial debt exposure. Fluctuations in interest rates can significantly affect our finance costs and overall profitability.

The company's **Total Borrowings** of ₹2,750 Crore expose us to floating interest rate risk for a substantial portion of our debt. Our ability to generate sufficient cash flows to service this debt is paramount. While our **Interest Coverage Ratio** of **2.0x** provides a buffer, a significant rise in lending rates or a decline in operational performance could strain our debt-servicing capacity. The substantial **Net Debt** of ₹2,600 Crore necessitates continuous monitoring of capital adequacy.

3. Operational and Technology Risk

A. Resource Intermittency

Solar power generation is inherently subject to weather conditions and irradiation levels. Lower-than-expected Plant Load Factors (PLFs) directly translate to lower revenue.

B. Project Execution Risk

Delays in land acquisition, securing regulatory approvals, or EPC execution can lead to cost overruns and penalties. We have centralized project monitoring and employed dedicated liaison teams to mitigate this.

4. Foreign Exchange Risk

A significant portion of our capital expenditure (solar modules, inverters) is imported and denominated in US Dollars. Adverse currency movements can increase project costs, which are often fixed under PPA terms. We use forward contracts and options to hedge a portion of this exposure.

5. Standalone vs. Consolidated Figures

Note that throughout this report, we have used both standalone and consolidated figures. For instance, the **EBITDA of ₹420 Crore** is a consolidated figure, but some management commentary might refer to standalone operational performance where relevant to specific project segments. Users of this report should exercise diligence in distinguishing between these financial presentations. The profitability and key ratios, particularly those related to debt, are best interpreted using the consolidated figures as they represent the group's full financial position.

Notes to Accounts

Note 6: Borrowings

This note provides details on the company's various debt instruments and obligations.

All figures are in ₹ Crore.

Classification	FY23 (Consolidated)	FY22 (Consolidated)	Details of Security
Non-current Borrowings			
Term Loans (Secured)	2,300.0	2,100.0	Secured by hypothecation of specific project assets and revenue streams.
Non-Convertible Debentures (Unsecured)	150.0	100.0	Listed, fixed interest rate.
Total Non-current Borrowings	2,450.0	2,200.0	
Current Borrowings			

Classification	FY23 (Consolidated)	FY22 (Consolidated)	Details of Security
Working Capital Loans	200.0	150.0	Secured by floating charge on inventories and receivables.
Current Maturities of Long-term Debt	100.0	50.0	Part of the term loan principal due within 12 months.
Total Current Borrowings	300.0	200.0	
TOTAL BORROWINGS (A+B)	**2,750.0**	**2,400.0**	

The gross borrowings, including all short-term facilities utilized for operational liquidity, stood at **₹2,850 Crore** as of the reporting date. This figure differs from the total borrowings shown in the balance sheet due to the exclusion of certain debt-like provisions from the main balance sheet classification.

Note 7: Net Debt Reconciliation

Net Debt is calculated as Total Borrowings less Cash and Cash Equivalents.

Particulars	FY23 (₹ Crore)
Total Borrowings (as per Note 6)	2,750
Less: Cash and Cash Equivalents	(150)
Net Debt	**2,600**

The company's internal debt management calculation, which includes restricted cash from project reserves, yields a Net Debt figure of **₹2,650 Crore**. The difference of ₹50 Crore relates to cash held in an Escrow account linked to a specific PPA, which is not freely available for general corporate use.

Note 8: Exceptional Items

The Exceptional Item of ₹5.0 Crore (FY23) relates to the recognition of a one-time gain from the sale of excess land adjacent to a recently completed solar park.

Segment Reporting (for the year ended March 31, 2023)

The company operates in three primary segments: Solar Generation (SG), Engineering, Procurement, and Construction (EPC), and Operations and Maintenance (O&M).

All figures in ₹ Crore.

Segment Revenue

A detailed breakdown of revenue generation across operating segments. Note the reconciliation adjustments leading to the final consolidated revenue figure.

Segment	FY23 Revenue	FY22 Revenue	Inter-Segment Revenue	Net External Revenue
Solar Generation (SG)	650.0	550.0	-	650.0
EPC	350.0	270.0	(15.0)	335.0
O&M	50.0	40.0	(10.0)	40.0
Total Segment Revenue	**1,050.0**	**860.0**	**(25.0)**	**1,025.0**
Reconciliation to Consolidated Revenue				
Unallocated Revenue & Adjustments				(5.0)
Consolidated Revenue from Operations				**1,020.0**

Segment Results (EBITDA)

This table shows the contribution of each segment to the overall earnings before interest, tax, depreciation, and amortization (EBITDA).

Segment	FY23 EBITDA	Margin (%)	FY22 EBITDA	Margin (%)
Solar Generation (SG)	390	60.0%	330	60.0%

Segment	FY23 EBITDA	Margin (%)	FY22 EBITDA	Margin (%)
EPC	25	7.1%	20	7.4%
O&M	20	40.0%	15	37.5%
Total Segment EBITDA	**435**	41.4%	**365**	42.4%
Less: Unallocated Corporate Expenses	(15)		(30)	
Consolidated EBITDA	**420**	**40.3%**	**335**	**38.9%**

Note: The total segment revenue of ₹1,025 Crore (net external) does not exactly match the consolidated revenue of ₹1,020 Crore, primarily due to rounding and minor reclassifications between segments in the final consolidation process.

Risk Factors

The company's operations are exposed to a variety of risks that could materially affect our financial condition and operational results.

1. Regulatory and Policy Risk

Our business is highly dependent on favorable government policies related to renewable energy. Any adverse changes to feed-in tariffs, PPA terms, or regulatory mandates concerning grid connectivity and land acquisition could negatively impact project economics.

Risk Dimension	Impact	Mitigation Strategy
PPA renegotiation/termination	Loss of contracted revenue and asset impairment.	Diversification of off-takers (central, state, and commercial/industrial).
Change in solar import duties	Increased project cost, reducing competitiveness.	Maintaining a diversified procurement strategy and pre-ordering key components.

Risk Dimension	Impact	Mitigation Strategy

2. Financial and Interest Rate Risk

Our high capital intensity leads to substantial debt exposure. Fluctuations in interest rates can significantly affect our finance costs and overall profitability.

The company's **Total Borrowings** of **₹2,750 Crore** expose us to floating interest rate risk for a substantial portion of our debt. Our ability to generate sufficient cash flows to service this debt is paramount. While our **Interest Coverage Ratio** of **2.0x** provides a buffer, a significant rise in lending rates or a decline in operational performance could strain our debt-servicing capacity. The substantial **Net Debt** of **₹2,600 Crore** necessitates continuous monitoring of capital adequacy.

3. Operational and Technology Risk

A. Resource Intermittency

Solar power generation is inherently subject to weather conditions and irradiation levels. Lower-than-expected Plant Load Factors (PLFs) directly translate to lower revenue.

B. Project Execution Risk

Delays in land acquisition, securing regulatory approvals, or EPC execution can lead to cost overruns and penalties. We have centralized project monitoring and employed dedicated liaison teams to mitigate this.

4. Foreign Exchange Risk

A significant portion of our capital expenditure (solar modules, inverters) is imported and denominated in US Dollars. Adverse currency movements can increase project costs, which are often fixed under PPA terms. We use forward contracts and options to hedge a portion of this exposure.

5. Standalone vs. Consolidated Figures

Note that throughout this report, we have used both standalone and consolidated figures. For instance, the **EBITDA of ₹420 Crore** is a consolidated figure, but some management commentary might refer to standalone operational performance where relevant to specific project segments. Users of this report should exercise diligence in distinguishing between these financial presentations. The profitability and key ratios, particularly those related to debt, are best interpreted using the consolidated figures as they represent the group's full financial position.
